November 22, 2000

Mr. Paul Perkins
Colliers International
5310 Kietzke Lane, Suite 105
Reno, NV 89511

Paul:

I want to take a few minutes and thank you for your professionalism, effort, and real estate knowledge in this market. It is rare that I meet an individual who is as qualified as you to assist in a major building project.

You really performed the one stop shop for us. You participated in drawing up the original build-to-suit specifications, recommended several developers, participated with our team on the bid evaluation and negotiations while concurrently identifying and selecting a suitable site. The permitting process was lengthy and your involvement and knowledge of the power structure in Reno was a great help.

When we required additional short-term warehouse space you were able to find us suitable space in the Stead area.

Paul, again I can't thank you enough for your involvement and support of our team.

Best regards,

Tyco Valves & Controls-Reno

Roger L. McMillin
Operations Manager
